# PartnerBoost Tracking Docs 2.0

Step 1: Add PartnerBoost tracking script to your website

1. Insert the following code into the `<head>` tag of EVERY page of your website:

```
<script>
  var script = document.createElement('script');
  script.setAttribute('src',
'https://app.partnerboost.com/brand/track.2.0.min.js?bid=YOUR_BRA
ND_ID');
  document.head.appendChild(script);
</script>
```

2. Replace `YOUR_BRAND_ID` with your own brand id, which you can find in the PartnerBoost dashboard by hovering your mouse over your username on the top right corner.

Step 2: Add PartnerBoost order tracking script into your checkout page

1. Insert the following code into the `<head>` tag of your checkout page.

Note: In order for the scripts to work properly, please make sure you insert the script in Step 1 before you insert this part of the scripts!

```
<script>
try {
  window['PB']['submitOrder']({
    order_id: "YOUR_ORDER_ID",
    amount: "YOUR_ORDER_AMOUNT",
    currency: "YOUR_ORDER_CURRENCY",
    couponcode: "YOUR_ORDER_COUPONCODE_OR_EMPTY",
    skus: [
      {
        sku: "SKU_ID",
        quantity: "SKU_QUANTITY",
        price: "SKU_PRICE_AMOUNT"
      }
    ]
  });
} catch (e) {
  console.error("PB.submitOrder error: ", e);
}
</script>
```

2. Replace `YOUR_ORDER_ID`, `YOUR_ORDER_AMOUNT`, `YOUR_ORDER_CURRENCY`, `YOUR_ORDER_COUPONCODE_OR_EMPTY` with your actual order details.

NOTE: `YOUR_ORDER_AMOUNT` is the total amount of the order (excluding shipping and taxes), in which this amount will be used to calculate commission for your affiliate partners.

3. Replace `SKU_ID`, `SKU_QUANTITY`, and `SKU_UNIT_PRICE` with your own sku id, quantity, and unit price

4. When a order contains multiple SKUs, store all SKUs in the skus array:

```
    skus: [
        {
            sku: "SKU_ID",
            quantity: "SKU_QUANTITY",
            price: "SKU_UNIT_PRICE"
        },
        {
            sku: "SKU_ID",
            quantity: "SKU_QUANTITY",
            price: "SKU_UNIT_PRICE"
        },
        ...
    ]
```

5. Make sure the sum of all skus.price * skus.quantity equals amount,
   excluding shipping and taxes.
